RESTRICTION REQUIREMENT

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a beverage precursor and tea beverage, classified in class 426, subclass 597.
 - II. Claims 19 and 20, drawn to a method of using the precursor, classified in class 426, subclass 597.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the precursor may be combined with crushed ice which is allowed to melt to form a beverage. In addition, the precursor may be used as a flavoring additive to other food products such as a rice dish.
3. Because these inventions are distinct for the reasons given above and the search areas and search strategy required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected

Art Unit: 1761

invention, the inventorship must be amended in compliance with 37 CFR

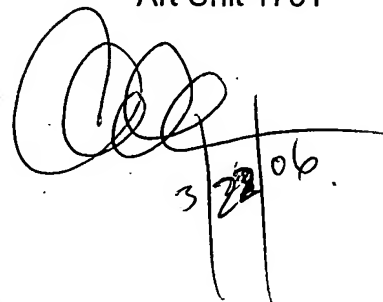

1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
